

The **Safety Driven** Telematics Solution

Unsafe driving behavior is a growing risk for commercial fleets. **Azuga Fleet provides a powerful, turnkey telematics solution** that helps your insureds reduce accidents, lower claims costs, and improve driver behavior—backed by actionable data and video evidence.

Unsafe Driving Costs:

Average cost of an accident:	\$16,500
Average cost with injuries:	\$74,000
Average cost with fatalities*:	\$500,000

Understand Risk Before It Becomes a Claim

Identify trends in risky driving behaviors like speeding, hard braking, and distracted driving, so your clients can act before accidents occur.

With Azuga's simple "plug and play" OBDII device, your clients can quickly deploy telematics that drive measurable safety improvements—without costly installations or downtime.

Paired with the SafetyCam, your clients also gain a trusted witness on the road.

Dual-facing video provides clear, indisputable evidence to speed up claims resolution, reduce liability, and protect both drivers and businesses.
