

Fall storm preparation checklist

Conduct annual safety and training for slippery, wet, and icy conditions.

Quarterly review of safety protocol for all workers.

Quarterly review of personal protective equipment (PPE) required for workers operating in extreme weather.

Incident reporting requirements for all workers.

Conduct a complete and thorough assessment of each job site before work begins, identifying active utility lines.

Ensure each job site has backup power, preferably a generator.

Ensure all safety plans adhere to OSHA guidelines.

Regularly review safety and operational material for all equipment, especially equipment used in fall weather.

Encourage and ensure prompt reporting of all incidents that occur on the job site.
